Blue Grouse

Ned Johnson

on June 20, 1953 -
La Rivers saw a hen with approximately five chicks in an aspen grove at the base of the cliff near the head of Scofield Canyon, and on the same date and in the same area Earl observed four adults in Mountain mahogany near a meadow.

referring to Ernest Carl

In 1972, the fresh remains of an adult female which had been killed by a predator were found strewn on a log and about the ground in an aspen grove at 8000' in Scofield Canyon
